## STREAM-ALIGN™ MODULAR COMPONENTS

### ENTRANCE / EXIT PLATE MODULES

ENTRANCE PLATE

- Convert your entrance plate configuration to allow for four trough entrance options
- Tube processing is facilitated by four options for quench entry.

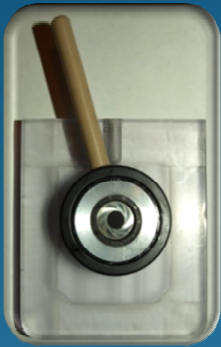

EXIT PLATE

- Convert your exit plate configuration to take advantage of digital repeatability
- Water level is controlled by an adjustable gate with digital indicator

## **BENEFITS FOR YOUR EXTRUSION BUSINESS**

- More repeatable physical properties for tubing
- Customize the modular system to your needs.
- Safer operation for your staff – reduce burns
- All the work has been done for you -  
save engineering time -

## ENTRANCE PLATE OPTIONS

**CALIBRATED  
IRIS**

- Allows repeatable control of variable iris sizes

**LARGE TUBE IRIS**

- Easily replace iris when lager tubing is extruded

**FIXED SIZED DISC**

- Fixed sized discs insures that the same opening is chosen every time

**TWO PIECE  
WEIR DAM**

- Two piece weir dams allows for quick control of water release and the same benefits of a fixed size disc

- All entry plates are easily exchangeable
- The iris inserts and fixed discs inserts are interchangeable
- Use the same base plate for all insertable options

*Rethinking Extrusion...*
